Work Experience

Eurolink Group

Lead Software Engineer

Jan 2023 – Present

- Led the Development of multi-tenant enterprise SaaS software with the team.
- Provided technical leadership to the team.
- Led migration of some projects from micro-services to monolith to reduce the cloud infrastructure cost.
- Worked closely with business stakeholders, and other team members, such as designers, product managers, business analysts, and testers, to contribute to the complete software development lifecycle.
- Mentored and coached the developers, fostering their growth and professional development.
- Conducted thorough code reviews, and offered constructive feedback to maintain code quality and consistency.

Cloud Stem Ltd (CTO & Co-Founder)

March 2016 – December 2022

Developed two SaaS B2B products and multiple bespoke software for diverse sectors ranging from Fitness, Real Estate, and Fintech.

- I was involved in designing the architecture of cloud-based SaaS products
- Developed client-facing websites and admin portals
- Built subscription modules on Azure Functions
- Integrated products with third parties e.g. Sendgrid, Twilio, Stripe, etc
- Managed and maintained the products with ongoing feature enhancements
- Released new features through CI/CD pipelines

LumenSoft Technologies Ltd (Software Developer)

Sep 2014 – Feb 2016

- One of the key engineers to migrate the legacy products to the cloud.
- Developed the in-house software for developers to plan, track, and deliver the product releases according to SCRUM
- Integrated the company's website with the leading bank's payment gateways to receive online customer payments.
- Managed the desktop products in VB.NET/SQL Server and kept the customers happy through real-time troubleshooting

Education

Forman Christian University (Lahore, Pakistan)

BSc (Hons) in Computer Science (87%) – 2010-14
