in person interview if needed)

## ABOUT ME

10 years of experience in front-end development, including a dedicated focus on React, Redux for the past 8 years, Vue js for 2 years and Angular for 4 years. I have honed my skills and expertise in creating robust and scalable web applications. I possess expertise in Interstellar and Constellation framework and Node js as well. My experience encompasses the entire development lifecycle, from designing and architecting applications to collaborating with cross-functional teams for successful project delivery.

## KEY SKILLS
