WORK HISTORY

GRIT Solutions - Data Engineer

Porto, Portugal • 08/2023 - Current

- Collaborated on ETL (Extract, Transform, Load) tasks, maintaining data integrity and verifying pipeline stability, in Microsoft Azure environment (Data Lake Storage Gen2 Databricks, Data Factory, Synapse).

TIQS Consultoria - Data Engineer

Rio De Janeiro, Brazil • 01/2019 - 07/2023

- In the first project, I was responsible for preparation of test plans, unit and integrated tests, data validation, as well as communication with end user, to carry out approval in deployments.
- In the second one, I work as data engineer, for on premises architecture, making design and doing maintenance of SQL Server database, as well as creation and maintenance of ETL, ELT and Python scripts, using libraries such as Pandas. Finally, I was assigned as team's technical leader, assisting the project manager in defining responsibilities and technologies for each sprint.
- In the third project, responsible for coding in Databricks, using Pyspark, during a migration of data from Oracle base, on premise, to Azure cloud, Acting in coding for generation of Delta files to be consumed by Power BI, applying business rules, previously used in Qlikview, on data extracted from database.
- In the last one, I was a Tech leader of a support team Acting on premises and Azure Cloud Environments and working with Data Warehouse, Data Lake, BI tools (Power BI and Qlik Sense), Databricks, Data Factory, Oracle and SQL Server databases.

Cement Roadstone Holdings, CRH Brasil - Senior System Analyst

Rio De Janeiro, Brazil • 08/2015 - 10/2019

- The company acquired Lafarge Brasil assets, including the entire IT area All aspects involved in work remained the same, developing same activities for CRH and Lafarge Brasil, during
