## ▪ Credit Risk

## ▪ Data Analysis & Visualisation

## ▪ Market Analysis

Versatile data analyst with recent international experience, leveraging the ability to adapt to change seamlessly and excelling within roles of increasing responsibility. Led and managed 15 projects at Worldbox Business Intelligence, developing and deploying comprehensive business entity databases with over 25 million records. Proficient in data analytics, and visualisation, showcasing a keen ability to extract meaningful insights from large datasets. Excels in database management, creating and maintaining SQL databases, delivering final products to clients in the finance, business intelligence, and IT sectors. With a strong history of optimising customer experiences, now seeking mid-senior positions in the field of data analytics and business intelligence within an established organisation.

## Areas of Expertise

▪ Data Management, Warehousing & ETL Processes ▪ Credit Reporting ▪ Data Analysis ▪ Project Management ▪ Leadership

Technical Expertise: ▪ AWS Services ▪ MongoDB ▪ Power BI ▪ Jira ▪ Snowflake Programming Languages: ▪ SQL ▪ Python ▪ R

## Key Achievements

- ✓ **Project Leadership:** Successfully led and managed 15 projects at Worldbox Business Intelligence, resulting in the development and deployment of comprehensive business entity databases with over 25 million records.
- ✓ **Multinational Team Management:** Managed a multinational team of 20+ members across India, Switzerland, the Netherlands, and Portugal, using Jira and Confluence to track project progress and ensure efficient project execution.
- ✓ **Client Acquisition:** Executed data analysis including preparation and cleansing, using programming languages such as Python, SQL, and R; presented results through reports, dashboards, and Power BI data visualisation tools, leading to the signing of 4 contracts with new clients.
- ✓ **Stakeholder Engagement:** Engaged with external stakeholders, such as OpenCorporates and Dun & Bradstreet, ensuring high-quality data delivery; interacted with clients to understand and meet their expectations regarding dataset formats and data elements.

## Professional Experience

### Multiple Roles | Worldbox Business Intelligence, London / Rotterdam | Oct 2021 - Present

Grew within roles of increasing scope, gaining promotion from credit analyst to senior data analyst in the second year of tenure, supporting the project delivery of an international provider of business intelligence on over 25 million companies worldwide.

### Senior Data Analyst | Worldbox Business Intelligence, London | Oct 2022 - Present

- Lead the planning, execution, control and delivery of 15 successful projects developing comprehensive datasets of corporate entities:
  - Use SQL and AWS services to create databases encompassing vital information, such as company activities, directors; shareholders, financials, shareholdings, sanctions, legal actions, and import/export details
  - Notable clients benefiting from these datasets include Experian Credit Services Ltd, Moody's Analytics Ltd, Vistra Ltd, Export Credit Bank of Turkey, Rubix Data Sciences PVT LTD, and Crif S.P.A.
- Manage a dynamic team of 20, including Business Analysts, Software Developers, and Credit Analysts, guiding them in Python code development and the implementation of Extract, Transform, and Load (ETL) processes.
- Use Jira and Confluence to meticulously track project progress and establish extensive documentation, effectively collaborating with a multinational team working remotely with offices in India, Switzerland, the Netherlands, and Portugal.
- Created and currently maintain 8 MySQL databases of 25 million companies across Canada, the USA, and Russia, delivering them as final products to clients, engaging with clients to understand their requirements, set expectations, and ensure alignment with objectives.
- Conduct data preparation, cleansing, manipulation and analysis for corporate information, including company profiles, financial data, sanction lists, shareholder records, and director details, applying Python, SQL and R ensuring clean, filtered, and analysed data.
- Collaborate with external stakeholders, including private data suppliers and corporate registries authorities, ensuring the delivery of high-quality data to clients, requested additional data from suppliers to enhance the overall quality of datasets.
- Report to the company owner and General Director, ensuring seamless communication and alignment with organisational objectives.

## Credit Analyst | Worldbox Business Intelligence, Rotterdam, The Netherlands | Oct 2021 - Oct 2022

- Collected and validated various business information such as company profile, directors, shareholders, sanctions listings, open legal cases and financials from wide-ranging sources to prepare an in-depth risk report, distilling complex data into actionable insights, and maintaining essential credit risk models:
  - Produced more than 900 reports on credit risk and ultimate beneficial ownership to assist clients in decision-making process.
- Conducted thorough credit risk assessments for businesses, evaluating financial statements, annual reports (following IFRS & GAAP accounting standards), as well as other relevant data to determine the credit rating of a company.
- Executed data analysis tasks employing statistical software (Excel, Python, R, SQL) to derive meaningful insights from extensive datasets; tasks included searching for financial and administrative data, validating incoming data for accuracy, and correcting discrepancies.
- Worked with public corporate registries of the EU, North America and CIS countries as well as private data suppliers such as OpenCorporates, Moody's and Bureau van Dijk.
- Actively participated in team meetings and cross-functional collaborations, contributing expertise to enhance the efficiency and quality of cleaning and preparing data for client delivery, ensuring the seamless progress of data-related projects
- Managed 200+ customer requests providing clients with updates ensuring delivered reports have up-to-date information about companies
- Enhanced credit risk reports with visually impactful charts, graphs, and tables using software such as Tableau and Power BI to facilitate a comprehensive understanding of credit risk profiles for the company management and clients.
- Stayed informed about industry regulations and compliance standards (Basel and BCBS 239), ensuring all credit-related activities adhered to legal requirements.

## Internships & Temporary Positions

### Intern | Think Pacific, Leeds | Jan - Apr 2022

Played a key role in the mapping and database creation of NGOs in the South Pacific for Think Pacific, fostering a network among 400 organisations across Australia, New Zealand, Vanuatu, and Fiji

### Market Research Consultant | Kombutxa, Barcelona, Spain | Jan – May 2021

Conducted market analysis and research of competitors for the company expansion into the UK and European markets, analysed quantitative and qualitative data, providing actionable insights and recommendations to support strategic decisions.

### Research Assistant | Yale MacMillan Centre, Remote | Apr – Jul 2019

Collaborated with Yale University scientists, managing the distribution of online survey links to targeted respondents for high response rates and data accuracy. Sent links via social networks, validated responses through random surveys, and maintained an organised SPSS database for efficient communication. Provided valuable feedback on polling procedures, suggesting enhancements for data collection efficiency.

### Project Intern | Profpoint, Saint-Petersburg, Russia | May 2018

Supervised mystery shopping tasks by assigning them via phone, reviewing assessment forms, and submitting them to Profpoint.

### Interviewer | Saint-Petersburg State University, Russia | 2017 – 2019

Conducted participant interviews as part of sociological projects at Saint-Petersburg State University, engaging in 6 assignments (2017 – 2019)

---
