### Senior Software Developer

[Turkish Airlines Technology, Ankara](#)

As senior software developer, I work with mostly with backend development using java and related technologies. I'm currently in Pricing Department which decides price of the flights which are possible in selected date.

### Software Developer

[OBSS, Istanbul](#)

- As a Software Developer, I have worked on different different projects.
- Generally, I'm working as Backend Developer which work with Java EE technologies but also I'm working on fronted parts of the projects too.
- Currently, I'm working on a data project in Anadolu Insurance company.

### Android Developer Intern

[OBSS, Istanbul](#)

- I was an Android developer intern in OBSS.
- I developed an application which was developed before by OBSS and published on Google Store. I completed the application and tested by OBSS test team.

### IT Support Assistant

[Penelope, Bursa](#)

- I worked in Penelope as IT Support Assistant
- It was an complete computer engineer experince for me because I worked with Hardware and Software parts.
- I learned SQL development in that experince and also I learned Delphi but I'm not an expert.

## Profile

Passionate Software Developer with more than 5 years professional experince building and developing different types of software projects. Proficient in Object Oriented Programming as Java Developer, but working as Full-Stack Developer.

## Education and Qualifications

- Sep 2012 - Jun 2017

### Bachelor's Degree

[Yeditepe University, Atasehir / Istanbul](#)

I gratuated from Yeditepe University as a Computer Engineer. My first year was prepatory year which I improved my English. And also first term of my third year, I went to Spain as an Erasmus student.

## Skills

| VueJS        | ★ ★ ★ ★ ★ |
| WebLogic     | ★ ★ ★ ★ ★ |
| Couchbase    | ★ ★ ★ ★ ★ |

## Projects

### Mentoring Application

It is a Spring Boot Application with React in Frontend that companies can manage their mentorship records in one system. Different types of users can be created in LDAP. In the application, users can manage phase details of mentorship or evaluate them or follow their status. Also, not only applying for getting mentor is possible but also every user can be a mentor.

### Anadolu Insurance Company:

In my current project, we are developing a middleware Spring application to connect two systems. This application includes XML parsing and process data which is extracted from them. In project Hibernate and Oracle is being used for database and also Kafka is being used for data flow one application to another . Also SOAP and REST services are being used.

### Omni Channel Project – Unico Insurance Company :

I was a backend developer in a web application project which includes sales of a insurance company in Turkey(UNICO INSURANCE) and also we develop web pages for users' applications who work in Unico. The project includes Java EE, REST, SOAP Web Services, PHP, Javascript and MyBatis for database of project. To examine the projects, you can visit every page of Unico Insurance. But also, backend part of a project is a always connected with frontend so that I can do frontend development too.

### Android Control Health Condition Application:

This is an android studio application that if a user wants to check his/her relative's health condition like take necessary pills or not, application gets a signal from a web service that has a signal about this condition and inform user in periodical time.

### Information Database System about Markets in Turkey:

I made a PHP project using MySQL to collect and save data about markets and workers in Turkey. Graphics is also used in different pages with the help of CSS and JavaScript. Users can reach information about products, workers, selling rates of markets etc. from a PHP page.

### Desktop Board Game:

It's a game which was developed on C++ programming language and includes artificial intelligence techniques while user is playing against to the computer.
