EXPERIENCE

Software Engineer

MobieTrain ↗

08/2022 - 07/2023

I spearheaded significant UI/UX improvements across all Mobietrain products, delivering enhanced user experiences and driving user engagement. Key contributions include:

- Introduced new and performant animation techniques, enhancing user engagement and overall learning experience.
- Implemented features aligned with the company's quarterly objectives, contributing to the continuous improvement of the platform.
- Collaborated closely with the Design team to review, create, and implement UI/UX improvement tickets across all company products, focusing on delivering visually appealing and intuitive and performant user interfaces.
- Improved overall test coverage by 15%, ensuring the reliability and quality of the company's software products.

Tech: React, tailwindcss, graphql, react-spring, react-lottie, redux, redux-toolkit typescript, react-intl, docker, React Testing Library.

Senior Software Engineer (Frontend)

Alerzo ↗

06/2021 - 02/2023

Led a team of engineers, managing and co-developing all frontend applications for Alerzo from the Lagos office. Key contributions include:

- Managed the entire software development lifecycle for the front-end web for all company frontend products.
- Introduced and implemented team-wide style guides and best practices for the codebase, code reviews, and version control; ensuring codebase maintainability and scalability.
- Created team strategies and established project scopes of work; communicated project deliverable timeframes and benchmarks with the chief product officer ensuring transparency with management.
- Co-developed and managed all Alerzo marketing sites for all products, greatly enhancing their digital footprint while ensuring great SEO ranking. This includes Alerzo main marketing site, Alerzoshop, Veedez, Alerzopay.

Tech: Nextjs, Netlify, clouinary, css3, react-chartjs-2, react-lottie, styled-components, framer-motion, React Testing Library.

Senior Software Engineer (Frontend)

Scalac ↗

06/2021 - 12/2021

Key contributions include:

SUMMARY

I am a frontend expert with over six years of experience as a software engineer. I have a passion for developing quality web experiences through the lens of interaction design, animation, and design thinking.

SKILLS

Software development	Advanced
Software Documentation	Advanced
Pair Programming	Advanced
Code Review	Advanced
Troubleshooting & debugging	Advanced
Effective Communication	Advanced
Time Management	Advanced
Attention to Detail	Advanced
Teamwork	Advanced
Leadership	Advanced
Digital Marketing	Intermediate

LANGUAGES

English	Native
German	Basic

EDUCATION

Electrical and Electronics Engineering
Covenant University

- Worked as a consultant in the engineering teams of partner companies, managing work-streams and aligning deliverables across multiple time zones and regions.
- Built and improved multiple internal and external tools/applications.

Tech: Nextjs, React Testing Library, React, NFT, MonoRepos, Typescript, Storybook, rxjs, react-table, react-svg-pan-zoom, aws-amplify.

Senior Software Engineer (Frontend)

Metro Africa Xpress ↗

01/2020 - 06/2021

As lead frontend engineer and technical product owner my key contributions include:

- Co-developed and maintained an application called MetroGov which enabled governments and organisations identify, monitor and tax commercial transportation.
- Co-developed and maintained Max Pipeline Activation and Management system which manages the recruitment process of Champions (Drivers) in MAX from Top of the Funnel, through Testing, then finally Activation.
- Co-developed and maintained the MAX marketing site, ensuring great SEO and increasing online visibility.

Tech : Ejs, React, React Testing Library, React-spring, Paystack, Docker, CircleCi, Formik, Axios, Docker, Jest, React-select, D3, React Hook Form, Express.

Frontend Web Developer

RightCom Technologies ↗

06/2019 - 12/2019

Key contributions include:

- Successfully co-developed version 1 of the company's survey application called RightSurvey in set time frame, meeting quarterly objectives.
- Collaborated with the design team to ensure technical feasibility of UI/UX designs.
- Developed and tested new user-facing features on internal products.

Software Developer

Andela ↗

12/2017 - 08/2018

Key contributions include:

- Successfully set up and deployed an asset management platform (Activo) with a team of engineers for in house use, greatly optimising our asset tracking and allocation.
- Collaborated on all stages of the software development lifecycle, from requirements gathering to production releases in assigned partner teams.
- Identified and suggested new technologies and tools for enhancing product value and increasing team productivity.
- Engaged in daily code reviews which helped improve code quality.

Tech: React, Typescript, Scss, Redux, Node, selenium, mocha.
