## SUMMARY

Experienced software engineer with a comprehensive 5-year bachelor's degree in engineering and ongoing pursuit of a master's degree. Backed by over one and a half year of professional experience, I am driven to propel my career forward by embracing continuous learning and tackling intricate projects. Committed to amplifying my skill repertoire, I am poised to contribute enthusiastically to innovative and demanding endeavors.

---

## EXPERIENCE

### Software Engineer

#### Ensolvers

February 2022 - Present, San Francisco, USA

- Tasks:
  - Team leader of a group of five developers
  - Full-stack web development, maintaining existing functionalities and creating new complete functionalities
  - Customer support with direct communication with the customer
  - Coaching of new members and interview new candidates
- Technologies:
  - Java 11/17, Spring Boot, Hibernate, JPA
  - PostgreSQL/MySQL
  - AWS Cloud Services (S3, ECS, CloudWatch, SES, SNS, etc.)
  - React

### QA Tester

#### Vates

July 2021 - February 2022, Córdoba, Argentina

- Created and executed automated software test plans, cases and scripts to uncover, identify and document software problems and their causes.
- Learned automated testing with Selenium

### Researcher development

#### Universidad Tecnológica Nacional

March 2020 - December 2021, Córdoba, Argentina

- Analysis and detection of patterns in a conceptual graph constructed from textual written answers to questions on a specific topic.
- Built RESTful APIs with FastAPI, receiving data from a GraphQL database
- Creation of new functionalities for an ASP.NET application
- Collaboration with 5 university tutors and 3 other students in an agile methodology.
- Technologies:
  - Python - FastAPI
  - ASP.NET
  - GraphQL
