SKILLS

FUNCTIONAL SKILLS

- PM Assistance**
1. Facilitate seamless communication and collaboration among team members.
 2. Ensure efficient project scheduling through organizational and time management skills.
 3. Produce comprehensive project documentation, including plans, status reports.
 4. Identify and assess project risks, developing effective strategies for risk mitigation.
 5. Apply strong analytical and problem-solving skills to address issues.
 6. Quickly adapt to changing project requirements and unforeseen challenges.
 7. Manage relationships with stakeholders to ensure alignment with project objectives.
 8. Efficiently allocate and utilize project resources, including team members and budget.
 9. Ensure project quality through rigorous testing and validation processes.
 10. Apply agile project management methodologies, such as Scrum.
 11. Make sound decisions to guide the project in alignment with its objectives.
 12. Navigate and resolve conflicts within the team to maintain project progress.
 13. Proficiently manage project budgets and ensuring financial compliance.
 14. Embrace learning and implement best practices for ongoing improvement.

Industries	<ol style="list-style-type: none"> 1. Diverse experience spanning Automotive, Information Technology, and other sectors. 2. Active participation in driving digital transformation initiatives. 3. Proficient in initiating and contributing to project design processes. 4. Comprehensive understanding and analysis of UI/UX vision for enhanced user experiences. 5. Strong collaborative skills, fostering teamwork to successfully achieve project goals. 6. Expertise in creating comprehensive unit tests for rigorous quality assurance. 7. Skillful qualification of user requests to align with project objectives. 8. Proficient in crafting functional specifications to guide development teams. 9. Effective resolution of bugs reported by users to optimize solution performance. 10. Proficient in project management using the agile methodology, particularly Scrum.
-------------------	---

TECHNICAL SKILLS

Development systems	Spring Boot, Spring (Cloud, Security, Batch, Data JPA, MVC), Hibernate, Maven, AWS, Azure Cloud, JPA, React.js, HTML, CSS, Bootstrap, Node.js.
Operation systems	Windows, Linux.
Programing languages	Java, Kotlin, JavaScript, Typescript.
Databases	MySQL, PostgreSQL, MongoDB.
Operating systems	Windows, Linux.
Integrations	CI/CD, AWS, Azure, GCP, Terraform, Docker, Kubernetes, Elasticsearch.
Languages	English, Arabic.

EDUCATION

2022 – Now	Starting Associate and Bachelor degrees in Computer Science on UOPeople
2016 – 2021	Self-learning programming languages and technologies (mentioned above)
2014 – 2015	Bachelor's Degree in Mathematical Science

PROJECT REFERENCES

HOME SHOPPING EUROPE

SINCE MAY 2021

Full Stack Spring Boot / React

PROJECTS LED :

Project: "hse.de" is a platform for electronic commerce and steaming commerce. It allow general customers (Germany, Greece and Switzerland) to purchase products. And contracted streamers to create products related videos for a commission.

INTERVENTION DOMAINS :

- Analysis and structuring of microservices requirements.
- Involvement in the analysis and technical design phases.
- Capacity planning and solution designs with stress testing.
- Maintaining real-time broadcasting services, quality, bitrate, chat, and stats.
- Participation in the development of the Frontend part.
- Design and implementation of Restful APIs with Spring.
- Participation in various SCRUM ceremonies (Sprint planning, Daily Standup Meeting, Retrospective).
- Design and implementation of disaster recovery solutions.
- Automation of testing and deployment processes.
- Optimization of system performance and efficiency.
- Bug fixes and system improvement.

TECHNICAL ENVIRONMENT :

- Typescript, Kotlin, Java, Spring Boot, Spring (Security, Batch, Data JPA), Junit, React, Jest, Python, Rest-API, Web-Socket, Docker, Terraform, AWS, PostgreSQL, Jira, Confluence , Git, Jenkins, Mural, Figma.

FIVERR

JULY 2017 – APRIL 2021

Consultant Java / React

PROJECTS LED :

- Building variety of project and fixing technical bugs on ongoing project. Mainly React, Node, Next and Spring Boot.

INTERVENTION DOMAINS :

- Participation in technical design.
- Responsible for integrations.
- Creation of new microservices from scratch.
- Customization of microservices according to client needs.
- Development of new features.
- Collaboration with the testing team and the infrastructure team.
- Detecting anomalies and bug fixes.

TECHNICAL ENVIRONMENT :

- Typescript, Javascript, Java, React, Spring Boot.
