

EDOARDO GORACCI

Address: Via dei Panconi, 35A – Pistoia (Italy)

Mobile: + 39 3381687981

E-mail: edogora.85@gmail.com

Date of birth: 25/11/1985

Nationality: Italian

PROFILE

I am a methodical and focused person, as I aim my goals with all my willpower. I consider myself a dynamic person, because I put a lot of effort into balancing an active life with work and family commitments.

I am currently interested on software development, and I would like to keep on growing on that area.

SKILLS

I mainly work as a Java developer. I have a good knowledge of Spring Framework (Dependency Injection, persistence, WebSocket, REST). I usually work with different DMBS (Microsoft SQL Server, Oracle, PostgreSQL and Hana). I have developed OSGi-based applications. I have worked for many years with Vaadin Framework, and I am familiar with CSS and SASS. In the latest years, I worked on the definition and development of a concurrent and high performances data acquisition system with micro-services architecture. I also have experience with Docker, and have successfully created containerized back-end applications.

I have a decent experience in Android applications development and maintenance (Java).

I have a good Object-Oriented Programming and Design Patterns understanding, and I use Test Driven Development methodology with success.

I often do maintenance or new features introduction on legacy codebases.

An important part of my work is the process of gathering technical specifications from business requests (I have daily meetings with clients); this information is used to define the next steps for developer teams, and to address specific issues to support teams (system engineers, DBA, technicians).

I also have some experience regarding server administration (both Windows and Linux). In detail, I managed virtualization structures (VMware vSphere, Microsoft Hyper-V), I have done performances analysis, hardware configuration and installation, system problems resolution.

WORK EXPERIENCES

09/2022 – ongoing: Rockware (consultant at Adobe)

Solution Architect – Agile software development and maintenance (back-end and front-end) on Adobe Enterprise Manager platform, manual/automatic testing, customer service support, technical documentation production and presentation, internal demos production and presentation.

09/2021 – 09/2022: Rockware

Solution Architect – Creation of a dockerized back-end application to integrate Adobe Campaign Classic platform with the Postal Service's public APIs, gathering, analysis and implementation of the requirements, coordinating and assisting front-end developers, participating in organizational meetings, technical documentation production and presentation.

11/2019 – 09/2021: Piksel (consultant at Autostrade Tech)

Tech lead – Software development and maintenance (back-end systems), Android apps development and maintenance, work organization with development team (back-end/front-end integration, mobile), technical assessment in personnel selection, technical documentation production and presentation.

01/2014 – 11/2019: CCH® Tagetik

Senior Software Engineer – Agile software development, manual/automatic testing, customer service support, technical documentation production and presentation, internal demos production and presentation.

06/2012 – 12/2013: Innova ICT (consultant at Consorzio Operativo Monte dei Paschi di Siena)

System engineer – server administration and maintenance network and virtualization infrastructure management.

06/2011 – 07/2011: Laboratorio di Computer Science - Consorzio Operativo Monte dei Paschi di Siena, Siena

Software Developer – Internship for bachelor's degree focused on Windows Mobile application development.

EDUCATION**16/04/2012**

Siena University – **Bachelor's degree – Computer engineering**. Thesis: development of mobile application for bank transfer with data encoding on QR Code.

15/07/2004

Liceo Scientifico Tecnologico (at Istituto Tecnico Industriale "Tito Sarrocchi"), Siena – **Scientific High School Diploma**.
