WORK EXPERIENCE

Frontend Consultant

Remote

Frontend Developer

2023 – Present

- Consult on React-specific projects for clients and in-house products.
- At New Relic, I help migrate their legacy React codebases to modern React, while drastically improving user experience with the use of their modern design components.
- At XRG, I lead the frontend team to build out internal products and also support the New Relic team in their migration.
- At HireHunch, I led the revamp of their [HunchVue](#) product to support advanced features such as Tabs, Test Cases and AI Question Library while clearing out the technical debt.
- Clients worked/working with: [New Relic](#), [HireHunch](#), and [XRG](#).
- Technologies used: TypeScript, Next.js, React, Firebase, CSS, HTML, design systems, web accessibility.

[HireHunch](#)

Bangalore, India

Frontend Developer

2022

- Led the UI launch of [HunchVue](#), a collaborative editor with video capabilities for an enhanced interviewing process.
- Led the core logic for processing video and audio chunks of interviews with Python and FFmpeg.
- Migrated the landing page to Next.js from regular React, resulting in improved SEO.
- Redeveloped the entire user onboarding flow, improving user experience and performance (Lighthouse metrics increased from the 70s to 95s).
- Technologies used: TypeScript, Next.js, React, Firebase, CSS, HTML, Node.js, Python, AWS.

[Piktorlabs](#)

Bangalore, India

Frontend Developer

2021-2022

- Architected and developed complex dashboards and features.
- Designed data stores for the application's major flows.
- Introduced best practices such as CSS modules and Redux Thunks, improving the codebase and reducing regression issues.
- Technologies used: JavaScript, React, CSS, HTML, Redux, and design systems.

OUTSIDE OF WORK

- I build [web apps for fun!](#)
- I read a [lot!](#)
- Mentor on [Topmate](#).
- I write technical articles on [Medium](#) and on [my personal blog!](#)
- I photograph wildlife at [@i_m_yhr](#).
