Employment History

Fullstack Engineer

WhatTrivia,Southington, USA, June 2023 - october 2023

Achievements and responsibilities:

- I built an MVP for the trivia business during my time at Whattrivia , I implemented interfaces for questions and events management, this was to make the already existing manual process more efficient and help foster effective collaboration.
- I was responsible for implementing the interface screens as well as handling communication with the Hasura graphql engine.
- I Noted and suggested areas for improvements in already existing designs.
- We Successfully deployed a beta version of the question and events tools.

Fullstack Engineer

Scrumanac,Abuja,Nigeria ,March 2021 - Febuary 2023

Achievements and responsibilities:

- Designed and implemented software systems in line with client requirements along with the product manager and line manager.
- Setup continuous integration pipeline for continuous code deployment.
- Identified areas for improvement in clients proposed systems.
- Was involved in designing and implementation of an estate management application, that allows homeowners manage a portfolio of all their properties.
- Increased the efficiency of a queuing system and removed processing bottle necks by efficiently using goggle pub/sub technology.

Backend Engineer

Finalytic,United Kingdom, June 2021 - September 2022

Achievements and responsibilities:

- During my time at finalytics I re-engineered their backend infrastructure and implemented Hasura GraphQL engine that feeds the front front application.

Full stack Developer

Esoft Response, United Kingdom (Contract),March 2022- august 2022

Achievements and responsibilities:

- During my time here I worked on the company's project management software (Something like Jira) , I was able to supercharge and optimize the application's Postgres queries to help reduce request latency.

Backend Engineer

Workaxle Canada June 2021 - September 2022

Achievements and responsibilities:

- Built and deployed an enterprise level workforce management software.
- I identified and recommended changes to the already existing system to make it more scalable.
