## SUMMARY

---

As an accomplished Android engineer with 8 years of experience, I have consistently delivered exceptional results, as reflected in key metrics and achievements. Throughout my career, I have developed a deep understanding of the Android platform and leveraged my expertise to create high-quality mobile applications. I have a proven track record of delivering projects on time and within budget, on-time milestone delivery. Additionally, I have mentored and trained junior engineers to increase their productivity and skill development. My proficiency in Java and Kotlin, combined with my utilization of Android Jetpack, MVVM architecture, RxJava, and Dagger2, has led to an improvement in app performance and user satisfaction. With a focus on code quality, I have consistently done unit testing and instrumental tests. By staying up-to-date with industry trends and best practices, I continuously contribute to the development of innovative and impactful Android applications.

## WORK EXPERIENCE

---

### Senior Software Developer

Branch International

January 2021 - March 2023

- Implemented and delivered feature enhancements for multiple applications using Java, Kotlin, and Ruby, contributing to overall functionality improvement.
- Demonstrated strong problem-solving skills by determining architectural and product design details for complex tasks, resulting in improved efficiency.
- Collaborated closely with quality engineers, user research, product management, design, and support teams to ensure high-quality app development, leading to a decrease in bug reports.

### Senior Software Engineering

iBUILD Global

January 2020 - December 2021

- Implemented product features using extreme programming practices, improving software quality and reducing time-to-market.
- Led key delivery outcomes and improved customer satisfaction through feature implementation and design enhancements.
- Collaborated with designers and business analysts in Agile Inception workshops, resulting in enhanced project alignment and reduced scope creep.

### Senior Software Engineer

Andela

January 2019 - December 2019

- Implemented a wide spectrum of product features, including frontend, backend, and AWS infrastructure, using various technology stacks through hands-on coding and extreme programming practices.
- Led key delivery outcomes by driving the implementation of new features and enhancing the design of existing features, resulting in increased customer satisfaction.
- Collaborated effectively with Designers and Business Analysts in Agile Inception workshops to define requirements, user stories, and release plans, ensuring alignment with project goals and objectives.

### Senior Software Engineer

TUNGA

January 2017 - December 2018

- Successfully identified and resolved bugs and errors in applications, resulting in improved software quality and reduced number of bug reports.
- Provided dedicated support and timely issue resolution to clients following app launch, achieving high customer satisfaction and fostering long-term client relationships.
- Managed all aspects of the Android app lifecycle, from research and planning to deployment and post-launch support, ensuring seamless project execution and reduced time-to-market.

### Mobile Technical Lead

Codesync

January 2017 - December 2018

- Led a team of Android developers, providing technical guidance, mentorship, and performance evaluations.
- Collaborated with cross-functional teams to define and deliver high-quality Android applications that embody our startup's culture of innovation.
- Developed and maintained complex Android applications that set new standards for performance, security, and user experience within the ecommerce industry.

### Mobile Application Developer

Lugelo

January 2016 - December 2017

- Assisted in the design of visually appealing and user-friendly interfaces, contributing to a comprehensive understanding of user needs.
- Performed coding, testing, and launch of Android applications on Google Play, ensuring the delivery of high-quality, error-free applications.

- Utilized cutting-edge tools and technologies to develop efficient and scalable digital applications, collaborating with global teams to meet project objectives.

#### Developer

Code Sync

January 2014 - December 2015

- Achieved project milestones and delivered results exceeding expectations.
- Demonstrated strong leadership skills by effectively coordinating cross-functional teams.
- Developed expertise in utilizing industry-leading software tools for project management.

#### Full Stack Developer

Data Care (U)

January 2014 - January 2015

- Developed an Android application for an NGO to collect data for analysis, facilitating efficient data gathering and contributing to informed decision-making processes.
- Successfully maintained and resolved bugs in a custom version of Android OS, ensuring the stability and reliability of the operating system for optimal device performance.
- Created data collection apps for field teams, improving data collection efficiency and accuracy.

#### Lead Mobile Developer

Flock of Birds

January 2011 - September 2013

- Played a key role in developing data collection apps, improving efficiency and accuracy.
- Implemented Firebase SDK and new line features, enhancing app functionality and user engagement.
- Designed and implemented visually appealing and intuitive user interfaces, increasing user satisfaction.

### EDUCATION

---

#### Makerere University

Bachelor of Engineering in Computer Science

August 2010 - July 2014

#### London college of st lawerence

Certificate of Education

January 2007 - December 2009

### SKILLS & INTERESTS

---

**Projects :** Lugelo, iBuild, Branch App, Social Deal, VaarWater

**Software :** Kotlin, Java, Ruby on Rails, Python, NodeJs

**Interests :** Traveling, Games, Hanging with Freinds
