Summary

Would like to highlight my skills in Java, Kotlin, SpringBoot, Unit Tests, Android Development, and Python. Always strive to share my knowledge with colleagues, both within and outside of work.

Interested in working in backend development (preferably) or full-stack, as I have a strong problem-solving ability.

Work experience

Codex Utilities Works / Tech Lead/Software Developer
March 2020 to Present, Campinas - SP, Brazil

About a year ago, I began my journey as a tech leader, dividing my leadership tasks with development tasks. I lead my team in developing and designing new features, as well as addressing bug fixes. I possess expertise in Java, Kotlin, SpringBoot, Unit Tests, Android Development, SQL, GIT, and Python.

EMDEC - Campinas / Urban Mobility Agent
January 2015 to December 2020, Campinas - SP, Brazil

As a public agent, exercised monitoring functions and operation of traffic and transport of people in the city from Campinas - SP.

Education

Faculdade de Tecnologia - Fatec Campinas / Technologist degree in Analysis and Systems Development
August 2018 to July 2021, Campinas - SP

Specialized in programming, systems analysis, and real-world software development projects, gaining practical expertise for the high-tech industry.

Federal University of São Carlos - UFSCar / Bachelor's degree in Mechanical Engineering
March 2009 to December 2014, São Carlos - SP

Comprehensive program covering mechanical principles, design, and analysis, with hands-on engineering project experience. Developed strong problem-solving, teamwork, and project management skills for a successful career in any project that I am involved in.

Skills

Backend | Kotlin | Java | Microservices | SQL | Python | TDD | Jira | Maven | Spring Framework | Unit Test | Android | Pandas | Scikit-Learn.
