ANDROID ENGINEER

VICTOR CHIJIOKE ELEZUA

PERSONAL PROFILE

I am an innovative software engineer who is particular about good UI/UX, clean code, and right development standards. I can bring the best of both worlds thanks to my technical training and previous work as a software engineer.

I enjoy learning about cutting–edge software design techniques and new tools so that I may use them to create innovative mobile experiences. Building thriving tech communities and contributing to open source are two other things I'm enthusiastic about.

AREAS OF EXPERTISE

- Java, Kotlin, Android SDK and Flutter, RxJava, Coroutines, Flow, LiveData MVVM, ExoPlayer, Media player, Retrofit and Volley.
- Spring boot, ExpressJS and Firebase experience.
- Working knowledge of cloud platforms, CI/CD tools and collaboration skills
- Working knowledge of common design patterns, data structures and algorithms.

OTHER SKILLS

- Great communication skills
- Can convert UI into usable interfaces
- Detail oriented
- Excellent problem solver
- Willingness to learn new relevant skills
