## ABOUT ME

I have hands on design and development experience ranging from server-side through the presentation layer in industries that include healthcare, e-commerce, and event management. I get up to speed on the technology stack, team dynamics, and the project vision very quickly and pride myself in being able to recognize inconsistencies or gaps in either requirements or their functional implementation, finding the right tools or resources to address the point in question, and appropriate resolutions in timely manners. Provided the opportunity I will make every effort to exceed expectations, to help those around me be excel in their roles, and to deliver thoughtful, scalable, maintainable solutions with emphasis on quality aimed at creating the best systems that can be coupled together bit by bit.

## WORK EXPERIENCE

### Application Architect
*Mobile Medsoft* [ 01/10/2015 – Current ]

**City:** Karachi
**Country:** Pakistan

- Supervised a team of 5 members (3 local & 2 remote).
- Designed and implemented cost-saving and profit-making strategies to make sure our product was on time and had all the necessary bells & whistles.
- Identified and resolved numerous highly visible issues in pharmacy systems on-site with users and remotely against data sources
- Created application framework on top of .Net Framework to standardize event handling, view transitions, and caching, introduce hooks for rapid prototyping
- Consistently worked towards high-value objectives, always with successful outcomes
- Documented and resolved programming, performance, and UI related issues which led to effective solutions.
- Developed a comprehensive set of software development best practices that increased code quality and overall system performance.
- Collaborated with cross-functional teams to ensure that the system meets customer requirements and business objectives.
- Relies on extensive experience and judgment to plan and accomplish goals on a consistent and productive basis.
- Develops software and follows the company SDLC (Software Development Lifecycle), which includes Agile sprint tasking and management using Jira
- Led prototype, work breakdown, effort estimate, and feature prioritization for multiple project plan commitments, and provided reasonable milestones.
- Led technical review of framework and subsystem design to align well with overall system architectures.

### Manager Business Solutions
*Abudawood Pakistan* [ 01/07/2015 – 30/09/2015 ]

**City:** Karachi
**Country:** Pakistan

- Conducted a comprehensive analysis of existing business processes to identify inefficiencies and develop solutions to improve operational efficiency.
- Developed and implemented a business continuity plan that ensured business operations continued seamlessly in the event of a crisis.
- Designing the architecture of the application & database based on the requirements.

- Code Review & Oversee Development Team
- Ensuring timely completion of projects and individual tasks.

## Senior Software Engineer
*Mobile Medsoft* [ 16/02/2009 – 30/06/2015 ]

**City:** Karachi
**Country:** Pakistan

- Serve as a Technical Lead contributing to and directing the efforts of development teams, including internal and external team members.
- Contribute to the ongoing evolution of the existing content supply portfolio of applications and services.
- Design, develop, modify, implement, and support software components anywhere in the Software stack.
- Determine the root cause for the most complex software issues and develop practical, efficient, and permanent technical solutions.
- Assist in task planning, estimation, scheduling, and staffing.
- Mentor team members to allow for skill/knowledge development through advice, coaching, and training opportunities.
- Determine process improvements, and best practices, and develop new processes.
- Work in close partnership with cross-functional teams and management.
- Develop high-quality software design and architecture.
- Identify, prioritize, and execute tasks in the software development life cycle.
- Automate tasks through appropriate tools and scripting.
- Review and debug code

## EDUCATION AND TRAINING

### MS Computer Science
*NED University of Engineering and Technology* [ 01/08/2014 – 31/12/2016 ]

**City:** Karachi
**Country:** Pakistan
**Website:** https://www.neduet.edu.pk/

### BS Computer Science
*University of Karachi* [ 01/01/2005 – 31/12/2008 ]

**City:** Karachi
**Country:** Pakistan
**Website:** https://uok.edu.pk/

## DIGITAL SKILLS

**Management**
Application Architect / Application Architecture / Analytical thinking / Attention to detail / Problem-solving / Communication / Atlassian stack (Jira, Confluence, ...) / Project Management Software (Jira, Trello, Workfront, Sharepoint, etc.)

**Coding**
C# / ASP.NET / .NET Core / WCF / Java (Android) / Git / Objective-C (iOS) / Web API / SQL / AJAX

**Web Development**
HTML / CSS / Bootstrap / JQuery / JavaScript
